AIM Sudoku 2025

2025!

by Cris Moore and Brian Conrey

Standard Sudoku rules apply. Each ? clue is an X-sum: the sum of the first x digits in the row or column coming from the clue, where x is the first such digit.

Every ? divides 2025, and the ?s are all different from each other. The three red ?s multiply to 2025, and the three green ?s also multiply to 2025.

Digits with a dot between them differ by 1 if the dot is white, and by a 1:2 ratio if the dot is black. Digits a knight's move apart must be different.
